Searching FOREWARN in Seconds

FOREWARN provides instant & mobile identity verification and public records (criminal, property, court, etc.) for over 98% of the U.S. adult population.

- With FOREWARN's roughly 90% coverage of mobile and residential phone numbers, you should be able to search and verify most people from their phone number alone.
- When you are unable find an individual in FOREWARN using a phone number, this does not necessarily mean fraud or criminal intent. FOREWARN users are encouraged to gather further details and use the additional search functionality (the "Search by name" link) within the FOREWARN app to ensure verification of the prospect.
- Name search tip: When searching by name, if there are more than 100 results to your query, FOREWARN will display "Too many records found" and prompt you to re-run your search using additional criteria.
- Phone search tip #1: In the search results, FOREWARN displays all the individuals who have ever been associated/linked with the searched phone number. It is normal for multiple people to be linked to a single phone number, either as previous owners of the phone number, or relatives.
- Phone search tip #2 – "Record not found": If you search missed calls from telemarketing companies (typically they will not leave a voice message), you will get the result "Record not found" because that phone number has never been owned by, or associated with, a person.
