Happy November!

November is an important month in our home because it is when we celebrate Veteran's Day. Radon Xpress Inc. is a Veteran owned and operated radon mitigation company. Becca Willey is very active at TRAR, having been the Affiliate Chair multiple times as well as YPN and RPAC Chairs. She took part in the association's first ever Leadership Development Program, spent two years as a Board of Director and has won Affiliate of the Year THREE years in a row.

Radon gas is a clear, odorless gas that emanates up through the foundation and into your home. It is the cause of roughly 21,000 cancer related deaths a year and is the number two cause of lung cancer, behind smoking, per the EPA. To put that into a harsh perspective, Radon kills more people a year than drunk driving. Shockingly, the IEMA accepted limit of 4.0 has the same harmful effects as smoking 10 cigarettes a day.

The EPA has also stated that roughly 41% of all homes in Illinois have elevated radon levels. That is almost a 1 in 2 chance your home needs to be mitigated. And while Radon is a health hazard, it also has a simple solution.

One thing we encourage our Realtor[®] partners to pass onto their buyers and sellers, is that radon levels should never be a deal killer because they can be mitigated. Depending on the different foundation types, the age of the home, and the precise levels of radon present, a custom designed radon mitigation system can be installed to keep the deal on track to the closing table.

2022 threw many buyers and sellers curve balls. Being tied to the Real Estate industry, and still being deemed "Essential", we are thankful to RPAC and industry leaders, for keeping Real Estate moving, and even thriving. As RPAC PRESIDENT CIRCLE, Major Investors, we at Radon Xpress know the value of homeowner's rights, and the fundamental right of every person is to feel safe and secure in their home. As you and your clients spend more time than ever these days in your home, we encourage you to get it tested for radon.

We strive to get radon levels as low as we possibly can, while keeping it affordable for everyone. Every home owner has the right to a safe and healthy home. At Radon Xpress Inc. we believe knowledge is power and educating yourself on the dangers of radon should be at the forefront of your family's health.
